PROFESSIONAL SUMMARY

Computer Science engineering graduate with hands-on experience in application development, REST API integration, backend development, database connectivity, application testing and cloud deployment. Proficient in Python, JavaScript, TypeScript, Node.js, Express.js, Django, SQL and MongoDB. Experienced in integrating frontend applications with backend services, implementing authentication and deployment applications using cloud platforms. Eager to contribute to enterprise application implementation, integartion and technical support at Accenture.

EDUCATION QUALIFICATION

BE in Computer Science Engineering	SKSVM Agadi College of Engineering and Technology, Laxmeshwar (2022–2026) — CGPA: 8.9
PUC	SK Arts and HSK PU Science College, Hubli (2020–2022) — 85.16%
SSLC	Sri Dundi Basaveswar High School, Tadas (2016–2018) — 94.24%

TECHNICAL SKILLS

Programming and Scripting:	Python, JavaScript, TypeScript
Application Development:	HTML5, CSS3, React.js, Node.js, Express.js, Django
API integration & Testing:	REST APIs, API integration, Postman, API Debugging, JSON
Databases & Management:	MongoDB, MySQL, PostgreSQL, Firebase, Fire store, CRUD Operations
Cloud & Deployment:	Render, Firebase, Application Deployment, Backend service integratio
Development Tools:	Git, GitHub, VS Code, PgAdmin

INTERNSHIP EXPERIENCE

Software Development Intern — Bluestock Fintech (Oct 2025 – Nov 2025)
• Developed and maintained backend modules using Node.js and MySQL for company registration and verification.
• Implemented secure user authentication including login, registration and password recovery.
• Tested and validated REST APIs using Postman and collaborated in debugging application issues.
• Integrated frontend applications with backend REST APIs for seamless data communication.

Python Full Stack Developer Intern — Aitch Nu Global Technologies
• Worked on full-stack web development using HTML, CSS, JavaScript, React, Django and MySQL.
• Built projects including Student Portal Dashboard and React Task Manager.
• Performed CRUD operations and database connectivity while gaining experience in frontend, backend and database integration.

PROJECTS

Task Management & PDF Progress Tracker
Technologies: Python, Django, HTML, CSS, JavaScript, MySQL
Live Demo: https://taskmanager-j81y.onrender.com/
• Developed a full-stack task manager with CRUD operations, status tracking and PDF upload/reading progress tracking.
Used the Django Admin Panel to manage users, tasks and uploaded documents.

TaskFlow — React Native Task Management App
Technologies: React Native, TypeScript, Firebase Authentication, Firestore, Node.js, Express.js, MongoDB, REST API, Render
APK (Download App through this APK): https://lnkd.in/gJWz3erb
Demo Video: https://lnkd.in/guqjDsT6
• Built a mobile task management application with registration/login, task creation, editing, deletion and task tracking.
• Integrated Firebase Authentication and Firestore with a Node.js/Express backend and MongoDB for task persistence.
• Connected the mobile application to a deployed backend hosted using Render and tested API communication across devices.

Food Search & Recipe App
Technologies: React, Vite, JavaScript, Spoonacular API
Live Demo: https://preetibidarageri.github.io/food-app/
• Created a recipe search application with API integration, recipe listing and detailed recipe views.
• Implemented responsive UI and handled API states and duplicate-result rendering.

React API Explorer
Technologies: React, JavaScript, REST APIs
Live Demo: https://preetibidarageri.github.io/API-Toolkit/
• Built pages/components for Random User, Joke, Weather and Country API integrations.
• Implemented useEffect, event handling, routing and reusable components for API-driven interfaces.

Study Material Website
Technologies: HTML, CSS, Node.js, SQL
• Built a centralized platform for students to access notes, question papers and study resources.

Diabetic Care and Dietary Management System for Type-1
Technologies: PHP, MySQL, HTML, CSS
• Developed an application to monitor glucose levels and dietary intake with insulin calculation logic using ICR and ISF formulas.

ADDITIONAL DEVELOPMENT
React Router, React Hooks (useEffect, useReducer), Firebase authentication, Firestore, MongoDB integration, REST API development/testing, Git/GitHub collaboration, deployment with Render.
